

72. A supported comestible comprising:

- (a) a comestible comprising a body of an edible substance,
and
- (b) a substantially composite edible support suitable for
supporting said comestible, said substantially composite
edible support having a first portion extending into
said comestible, said first portion having sufficient
surface area and means for adherence within said
comestible to support said comestible, said
substantially composite edible support having a second
portion extending outside said comestible, said second
portion having sufficient surface area to provide a
utilitarian support for said comestible.

73. The supported comestible of claim 72 wherein said
comestible comprising a body of an edible substance
is substantially frozen.

74. The supported comestible of claim of 72 wherein
said edible support is substantially non-malleable.

75. The supported comestible of claim 72, further
including sufficient surface area on said second
portion so that a person can hold said edible

support and said comestible with a hand.

76. The supported comestible of claim of 72 wherein said edible support comprises a selection from the group comprising, a) a sugar, b) a sugar substitute, c) a candy ingredient, d) candy, e) a candy bar, f) a candy bar ingredient, g) a confection, h) a confection substitute, i) fruit, j) nuts, k) grain, l) a medicinal ingredient, and m) chewing gum, said edible support comprises edible particulate matter, said edible support comprises a homogenous comestible.
77. The supported comestible of claim 72, further including an additional confection on said edible support, said additional confection provides a lollipop configuration on said edible support for additional flavor and amusement for a consumer, said additional confection comprises means for providing increased surface area for adherence of said supported comestible to said edible support for consumption, wherein said additional confection comprises chewing gum.
78. The supported comestible of claim 72, further

including an ingredient of a manufacturer and means for providing an already familiar taste to a consumer.

79. The supported comestible of claim 72, further including means for inhibiting the breakage of said edible support.
80. The supported frozen comestible of claim 72, further including means for providing a supported comestible designed for a child.
81. The supported comestible of claim 72, further including a moisture-proof barrier on said comestible and said edible support, said moisture-proof barrier comprises a) means for preventing the transfer of moisture from said supported comestible to said edible support, b) means for providing a secure hold of said supported comestible to said edible support for consumption of said supported comestible, c) means for providing a prolonged shelf life for said supported comestible, d) means for separating a plurality of supported comestibles from each other on said edible support, e) means for providing additional flavor and enjoyment on

said edible support, wherein said moisture-proof barrier comprises a) texture on said moisture-proof barrier for providing additional adherence of said supported comestible to said edible support, and b) additional flavor and a light crunch texture on said supported comestible and said plurality of supported comestibles.

82. The supported comestible of claim 72, further including a protective mess guard on said supported comestible, said protective mess guard provides a physical barrier for effectively keeping fingers from melting ingredients on said supported comestible and from getting messy.

83. The supported comestible of claim 72, further including a protective drip guard on said supported comestible, said protective drip guard catches melting portions of said supported comestible for preventing a mess on fingers and clothing, wherein said protective drip guard comprises a comestible.

84. The supported comestible of claim 72, further including a plurality of comestibles supported on said edible support, said plurality of comestibles

comprises a plurality of colors, shapes, sizes, flavors, ingredients and comprises means for differing from each other.

85. The supported comestible of claim 72, further including means for displaying said supported comestible, wherein said means for displaying comprises means for enabling said supported comestible to stand upright and on its own on a flat surface.
86. The supported comestible of claim 72 wherein said supported comestible comprises a three dimensional design.
87. An edible support for use in supporting a subsequently frozen comestible comprising a substantially composite edible support member, said substantially composite edible support member comprising a first portion for extending into said subsequently frozen comestible, said first portion having sufficient surface area and means for adherence within said subsequently frozen comestible to dependably support said comestible, said substantially composite edible support comprising a second portion for extending outside said subsequently frozen comestible, said second portion comprising

sufficient surface area for providing a utilitarian support for said subsequently frozen comestible.

88. The edible support for use in supporting a subsequently frozen comestible of claim 87 wherein said edible support comprises a substantially non-malleable support.

89. The edible support for use in supporting a subsequently frozen comestible of claim 87, further including means for inhibiting the breakage of said edible support.

90. The edible support for use in supporting a subsequently frozen comestible of claim 87 further including means for providing an edible support designed for a child.

91. A supported frozen comestible comprising:

- (a) a comestible comprising a body of an edible substance suitable for freezing,
- (b) an substantially composite edible support suitable for providing a utilitarian support for said comestible, and
- (c) means for supporting said comestible, whereby a person can enjoy a longer lasting supported frozen comestible,

since they can eat the support as well.

92. The supported frozen comestible of claim 91 wherein said edible support is a substantially non-malleable support.

93. The supported frozen comestible of claim 91 wherein said edible support comprises a confection, said confection includes a confection substitute.

94. The supported frozen comestible of claim 91, further including means for providing a supported frozen comestible designed for a child.

95. A method of providing a supported frozen comestible comprising:

- (a) providing a comestible comprising a body of an edible substance suitable for freezing,
- (b) providing a substantially composite edible support, said substantially composite edible support having first and second portions for supporting said comestible,
- (c) inserting said first portion of said edible support into said comestible, said first portion comprising sufficient surface area and means for adherence inside

- said comestible to support said comestible,
- (d) freezing said comestible and said substantially composite edible support, and
 - (e) leaving said second portion, having sufficient surface area outside of said comestible to provide a utilitarian support for said comestible.

96. The method of providing a supported frozen comestible of claim 95, further including means for providing a supported frozen comestible designed for a child.

97. The method of providing a supported frozen comestible of claim 95 wherein said edible support comprises a confection, wherein said confection comprises a confection substitute.

98. The method of providing a supported frozen comestible of claim 95, further including a sufficient surface area on said second portion so that a person can hold said edible support and said comestible with a hand.
